

Charles G. “Gil” Mull

~

Gil and I worked on North Slope/Brooks Range geology for more than 3 years, starting in 1963. He was a good friend and a superb working partner for both field work and the years we worked together on maps and reports for our company.. I will long remember his patience and partnership during those years. Gar Pessel

My wife, Betty, and I first met Gil on a float trip down the lower Colorado, in the late 1960s, later (mid-70s) visiting your home in Denver, where our then toddler-aged son went to sleep, on the floor, in a corner of your living room. Gil and I kept up a sporadic electronic contact over the years, seeming to be able to get together. Trying to locate him was not always easy. From this frame of reference, both Betty & I send our sincerest, though belated condolences
