An enormous thank you to Tom and Linda for the example your family was to me when we knew you in Orangeville. Some of the most profound and deeply peace filled and comfort giving eternal truths I treasure, I first learned as Mark and I played around while listening to Tom and my father talk. I fondly remember nights in Tom's shop or going visiting and doing service ('ministering' - before it was called that, it's just what they did and who they were) with Tom and my dad. I remember Tom helping me repair a broken tape player and him drawing a spiritual analogy from it that's stayed with me long after the tape player was gone - and still does! Fond memories of planning world domination of the pig market with Mark and Tom helping us see and consider the real practical calculations and considerations of the venture. Tom was and remains one of my real heroes and someone I still strive to emulate in his character and example though he may never have known the profound impact he had on

me. Thank you for sharing him with me and for your family's years of friendship to us.
