Dearest David, It has been over 8 years since you left me. I never stopped thinking of you... Eva is a young lady now. She and I are working on a book with my writings and her photo works and illustrations. I also included your poems and letters to me. For a man who loved me so much and once proudly said "I love her" to strangers on a street in China, I guess he wouldn't mind me annoucing my love for him in a book to be published. I also write emails to your family. I hope I will receive their response. Love you for ever, Ying
