All my life Betty has been there, but she was there for so many people. She told me that she has so many calls from people, to check on her and wanting to talk to her, that it seemed like she was always on the phone, but at the end of the call she would say she loved me and then she would tell me to call her when I got a minute, and I knew she wanted me to call her and have our hour long chats, but I knew I might be in a line to wait to talk to her. There are so many words of advice I got from her that keep coming up in my head that last few days and they make me smile. I feel "gutted". To my cousins, I feel so bad for you, I hear if you need me you guys.

Sorry to hear about your mom. I hope you are doing ok. If I can get there I will be to her viewing.
