

L. George Veasy

March 20, 1923 ~ February 3, 2021

I can not say all of the wonderful things we feel for Dr. Veasey. He was a great doctor to our son. We loved him for all of the work and advice he gave us. He was always calm regardless if the news was bad or good. He had a way to deliver it that was very reassuring. We haven't seen him for a very long time but we think of him almost daily. He will be sorely missed by this family.

I cannot express how much Uncle George meant to me. I am so very sorry for the family's loss. Uncle George always made me feel safe and not scared as a child with a congenital heart defect, he was able to help me understand what was happening and going to happen during surgery. Thanks to him I'm alive today. Thank you Uncle George from the bottom of my heart. Annie.

- Angela Barsballe (Annie Blomeley)

I don't really know why I started thinking of Dr. Veasy this morning, but I decided to try and look him up, and was saddened when I saw that he had passed. He was a phenomenal doctor, and an even more remarkable human being. I had a congenital heart defect at age 3. Dr. Veasy was my doctor from age 3 to age 18. I will never forget how awesome he was. He would always bring in several interns in to listen to my heart, and would always make my smile and laugh. RIP Dr. Veasy. I hope you know the positive impact you had on me. My sincerest condolences to the Veasy family.

I just found out that this great man had passed away three years ago. Dr. Veasy was my heart doctor when I was just five years old at the Primary Children's Hospital. I will never forget his kindness, his care, his wonderful skills and the trust I had in him. God bless his family.

My husband did tree work for the Veasy's years ago. They would call him every year for maintenance. One year I went with him and met George and Elaine and I never forgot them!! I was about 6 months pregnant with my daughter at the time and George told me he thought one of the most fascinating things about the growth of a baby in utero was that the baby's eyes start out on each side of the head, and move in together perfectly and symmetrically. I thought he was right!! What a truly amazing process. My husband adored the Veasy's. I could easily see why after I met them. My husband passed away in 2019 and I always thought about George and Elaine. I am so glad to see they both lived long lives and I am really not surprised. Such amazing, wonderful, kind people. I am happy to think all 3 of them had a reunion in heaven. Best wishes to the Veasy family. I am sure you will keep their legacy going :)

I'm so late in seeing this I'm so sorry for your loss. I was a patient of his from the time I was 6 weeks old I had a heart defect. I used to call him Uncle George me I was very lucky to have him as my Doctor. I know your proud of him in all he accomplished he was a great man, as well as a Doctor. Thank you Doc may you rest in peace
