Sending love and prayers at this sad and difficult time. We know that’ Sue has played an important part in your family and that she has been such a beautiful example of enduring well as she has dealt with these health challenges for so many years! What a beautiful legacy she has left of putting the important things first. We hope you all feel her near and will be comforted as you remember all the beautiful times you had together! Love Scott and Tirzah Kidd

I got to know Sue on our study abroad to London. She had to come through the bedroom I shared with four other girls to get to the dining room. I have fond memories of her dry sense of humor. We always had a laugh because of some little comment she made as she came through. Lastly Sue was very compassionate and thoughtful. I hadn't spoken to her years but she called me after my Mom and I were rear ended by a semi on I95. I'm sure terrible car wrecks brought up sad memories for her but she didn't shy away from reaching out to me. Sue called me to see how my Mom and I were doing. It will always mean a lot to me.

I came across this news by chance today and I am so saddened to read of the passing of Sue. She and I knew each other at Langley High and became friends during the time we volunteered working for the Guidance Counselors. I was new to the school too, having moved to McLean from Texas in the summer of 1973. I believe she was also new, and it was really nice to have a friend like her. Please accept my sincere condolences for your loss.

I remember when Sue was struggling with diabetes and needed a kidney transplant. Her dad, Senator Garn, was a match and volunteered to be her donor. I was the senator's press secretary and had the opportunity to represent the family to the news media. Jake, of course, was used to the limelight but not Sue— at least not with the bright media lights that came wi the this story. She was so gracious as she sat for interviews — even letting news crews come into her home to set up lights, mics and cameras. Then she graciously answered personal questions about her health, family, and life for so many curious reporters. I remember her testifying before a Senate committee and being so poised and brave. I remember her talking about her childhood and the challenges associated with her disease — needing to be so careful not to eat what other kids freely ate and always feeling different. Yet, she took it in stride. She had more challenges than most and yet always had a smile on her face and gratitude in her heart. She was a fighter and an example of faith, cheerfulness, love, and kindness.
