I was very lucky to have studied international politics and foreign policy under Dr. Robert S. Jordan from 1987-90 at University of New Orleans as well as to know him personally when we lived in Covington from 1998-2002. Bob was a profound influence on my course of study as well as my career path in life. I shall remember him fondly and miss him greatly.

Dr Jordan was a professor of mine at the University of New Orleans. I greatly enjoyed his classes and talks we had. He was also a reason I pursued a double major in Political Science and took part in the Model United Nations forum. As a graduate student, I assisted with research on his book on General Lauris Norstad. Dr. Jordan will always be a remembered by me as a kind and influential mentor during my days at the University of New Orleans. I

was sorry to hear news of his passing.
