Had funny feeling to check on greg, found he'd passed away. Suddenly no. Greg was diagnosed at 25 with lupus. Average lifespan from diagnosis is 40 years. Greg lived a very good life, 40 years beyond diagnosis, some off the

backs of others. He's now on the other side atoning for his life, like we all will, & he has a lot to atone. Best regards to his widow, lisa. Life goes on - as it always has.

- Ray
