Dear Cindy, It was with a broken heart that I read of your loss of Nyles. He was a wonderful man as a young midshipman and continued to be through the many visits to Annapolis.. Please except my deepest sympathy for you and your family. Nyles will always have a special place in my heart. Love Joyce

It is truly unfortunate that you left us so soon. My family and I would like to thank you for the profound difference you made in both my professional and personal life. I will always carry your wise advice with me throughout my journey. May God grant you the peaceful rest you truly deserve, Nyles Christensen. To Cyndy and the Christensen family, please accept our deepest condolences. Let me know if you'd like to personalize it further or adapt it for a card, speech, or message.

Nyles was truly a great friend. He came to many a boxing class and showed grit, courage and a willingness to never give up. I always felt like he was on a different level with his attitude and his desire to try. I will miss him and his great sense of humor. Nyles, may you rest in peace. Your family will be in my prayers.

Cindy and family, I am sorry for your loss. I was a classmate of Nyles at the Academy and also went submarines after graduation. I am originally from Colorado (near Grand Junction) so Nyles and I shared the love of the western mountains. Our lives had other parallel paths also. I was born April 29, 1953. I also have lived in Utah (Midvale) for the past 34 years. I have lots of family in the Price and had cousins graduate from Carbon High (family name - Austin).

- Larry Patrick

I just was informed this week. Nyles was amazing at Chevron El Segundo and saved the plant from an early permanent shutdown like what is happening now there with others, as his ability to identify critical mission issues was essential at the time. I later asked him to help us at CNRL Horizon in Northern Alberta, Canada which he did with excellence, and then also at Big West Refinery in Salt Lake, where he is fondly remembered by the owner. One of the very best ever in Chevron. Nyles gave it all in Angola as well. Trained by Rickover directly. Nyles breathed water which means when you had a problem 1000 feet down on a nuclear sub you just got to it. Did an amazing job restoring ESE. Restored the high pressure hydrogen reliability. Kept that refinery going. Last one standing I bet now, thanks in a great part to Nyles. What a fantastic legacy! Nyles was a key member of the ESE "Dream Team" in 1996 - 2000. Keep it going now Nyles! You are the best of the best! Dave Reed, RGM, El Segundo Refinery 1996 to Dec 1999.
