

Robert Daniel "Danny" Barman

December 16, 1961 ~ September 17, 2021

I’m so happy that I was able to see Danny, one of his girls and the twins recently. We are the same age and had some fun times when we were teenagers. That baby blue Ford truck was beautiful! I will remember the happy times we had having Sunday barbecues and firework celebrations. That is a great picture ❤■ Xoxo Laurie

I was so sad to hear about dannys passing I only worked with Danny for about a year but I loved every second of it and me and my brother had the oppritunity to work and live with danny down in moad for about 2 months and I loved how he was always smiling or making a joke about somthing, but one expirence I'd like to share is when we were driving down to moab i was driving and just trying to get to know danny a little better so i was asking questions about his family and i want you to know he talked about how proud he was of his daughters and how much he loved his grand daughters from the start of spanish fork cayon all the way to moab.

Sad to hear. My condolences to Gwen, his children and family. I worked with Danny for many years. A lot of fun memories of hanging out after work, road trips to California and Yuba lake.
