

Daniel Austin White

~

Age 84 passed away in his home on December 14th, 2024 of natural causes.

Dan was born in 1940 in Arizona to loving parents. His father was a forester with the BLM and as such Dan and his younger sister were raised in the beauty of the nation’s forest reserves, national parks and BLM land in many states including Alaska and Wyoming. This instilled in him a love of the outdoors which would be passed on to his own children.

After earning A Bachelor’s of Science from the University of Utah, he worked for the U performing Epizoology studies at the Dugway Proving grounds and eventually went on to be the Bureau Manager of Food Protection for the Salt Lake County Health Department.

In addition to being a true outdoorsman, Dan also excelled at birdwatching, hiking, hunting, target shooting and was a gifted photographer, although those of us who knew him never heard him brag about his beautiful photos. He was just naturally quite good at it.

Dan was preceded in death by his only sister and first son.

He is survived by his wife, second son and his daughter.

There is currently no formal memorial planned as the vast majority of Dan’s friends also preceded him in passing.
